

CUSTOMER FEEDBACK FORM

Walgreens, will you Mind the Store?

Today I'm joining thousands as we ask Walgreens for your leadership in addressing toxic chemicals in the products you sell.

Due to our lax federal laws on toxic chemicals, it's nearly impossible for an everyday consumer like me to find products that do not contain toxic chemicals linked to cancer, learning disabilities, and other serious health problems. There is little to no public information on toxic chemicals in consumer products.

I'm asking you today to take the lead in the Mind the Store challenge and create an action plan on eliminating the Hazardous 100+ toxic chemicals in your supply chain. Walgreens has both the power and responsibility to replace hazardous chemicals with safer alternatives.

Please share this important message with your corporate leadership and Sustainability Team. For more information you can visit:

www.MindtheStore.org.

Thank you,
